

David Waller

Principal Engineer, Ball Aerospace

Dave Waller is a mechanical engineer with 18 years experience in the aerospace field. He is involved in all aspects of satellite design, opto-mechanical systems, RF systems, EO sensors and performs mechanical design, analysis, and systems engineering for both civil and defense applications. Recent activities have focused on programs devoted to additive manufacturing. He has a B.S.E in Aerospace Engineering from Arizona State University and M.S.E in Aerospace Engineering from the University of Colorado Boulder.
