Dr. Zoe Szajnfarber is an Associate Professor of Engineering Management & Systems Engineering and of Space Policy at the George Washington University. Her research seeks to understand the fundamental dynamics of innovation in technology-intensive governmental organization, as a basis for decision-making. She received her bachelor's degree in Engineering Science from the University of Toronto and conducted her graduate work at the Massachusetts Institute of Technology, earning dual masters' degrees in Aeronautics & Astronautics and Technology Policy and a doctorate in Engineering Systems. Outside of academia, Dr. Szajnfarber has worked as a systems engineer at MDA Space Missions and Dynacon Inc.; and as a researcher at the European Space Agency and with multiple NASA centers.
